Perspective problem. Further, the teaching approach in a secondary school that provides a good foundation in mathematics and emphasizes problem-solving skills can lead to positive outcomes in learning and motivation. The seminar titled "Perspectives on Teaching Mathematics in Secondary Schools" was presented at ICOT." The paper concludes that effective teaching methods are essential in preparing students for higher education and future careers.

---

Facts and Figures

- The seminar on "Perspectives on Teaching Mathematics in Secondary Schools" was held at XYZ University.
- The seminar featured presentations from various educators and researchers.
- The seminar aimed to provide insights and strategies for improving mathematics education in secondary schools.

---

News and Comments

- The seminar was well-attended, with participation from educators and policymakers.
- Feedback from participants included suggestions for future seminars and workshops.
- The importance of ongoing professional development for mathematics educators was emphasized.

The seminar was organized by the ISGRMCS and supported by the National Science Foundation.
We have two new members.

New Members:

E-mail: NWONGOK@heretic.com.au

Perth, WA 6001, Australia

Ph.D. in Mathematics and Computer Science

Catholic University of Technology

Khoon Yew Wong has left Singapore and is now at:

E-mail: PHNEONGOK@heretic.com.au

Hong Kong

Ph.D. in Computer Science

University of Hong Kong

Dept. of Computer Studies

P.H. Chong is now a lecturer at the University of Hong Kong. His new address is:

- e-mail: PCHONG@heretic.com.au

Cambridge, U.K. 11820 USA

University of Illinois at Urbana - Champaign

Ph.D. in Computer Science

USA

Anh Khoi has also left BBN. He is now at:

E-mail: MA 0240

Cambridge, Mass. 02139

Harvard University

Anh Khoi is now working at TERC. His new address is:

- e-mail: MYUNG@terc.edu

Cambridge, MA 02141

New Column in Teaching Statistics
One of the problems with anecdotal evidence is that it can be difficult to quantify and generalize. However, some recent studies have shown that using teaching combinations of teaching strategies can be effective in improving students' learning outcomes. For this reason, my new column will focus on the use of teaching strategies in the classroom.

E-mail: Charles Green, Department of Computer Science, PhD

Examples of effective teaching strategies include: the use of computer simulations, the use of multimedia software, the use of interactive whiteboards, the use of group work, and the use of feedback.
