

Electronic Access to Literature in Theory and Practice of Statistics Education

Gerhard König
Fachinformationszentrum Karlsruhe, Germany

Do you have the chance to keep abreast of current developments in your field of interest? - Fast and comfortable access to literature on teaching mathematics at all levels in general and in particular on teaching stochastics (probability theory and statistics) is in this talk discussed. For this purpose the most important bibliographic database in mathematics education, the database MATHDI (MATHematics DIactics), is presented in more detail. The literature search in MATHDI is exemplified by identifying publications relating to the topics of this conference.
