In Korea, public officials are selected through a competitive examination to be. Test subjects in the Constitution, public administration, administrative law, English, Korean history, Korean, Statistics, and the like. Thus, new officials of Korea Statistics lack the knowledge needed to produce national statistics.

Statistical Training Institute is the only institution that specializes in the field of statistics can be utilized in business and education to be a priority. But, Consisting of three or five days education is difficult to achieve the objectives. Thus we designed long-term(16 weeks, 48 hours) based professional development courses like postgraduate curricula.

This poster is six operating procedures intended to talk about the experience.
