

Instructions for teachers and university level students

Teacher's instructions (lower secondary school and upper secondary school)

The teacher's role is important in the lower secondary school and upper secondary school categories. The teacher also signs the students up for the competition.

Because the sign-up period is long (**country coordinator informs about the competition time of their own country**), you can utilize the competition in the teaching during both Spring and Autumn terms. The competition works well as a method for teaching statistics.

Do the following:

1. Tell the students about the competition and its rules.
2. Let the country coordinator know the amount of participating students. You can sign up competitors from different groups and at different times during the whole sign-up period. Sign-up begins on the 5th of January, 2022.
3. Give a short introduction on how to do a statistical poster
4. Leave the participants enough time to create a poster.
5. Choose the best posters that will be sent to the national competition. You can also organize an evaluation event or an exposition in your learning institution. You can tell the media about the competition and the possible exposition.
6. Send the best statistical posters to your own country's country coordinator as soon as they are ready or 1st of February, 2023, by the latest. The posters can be returned in paper or document format.

The national jury will go through all the returned posters and choose the winners to be sent to the final and to be evaluated by an international jury. An exposition will be assembled out of the best statistical posters and shown in the 64th ISI World Statistics Congress in Ottawa, Canada. The international winners will be released in July 2023 and the winning posters and their creators published online.

Instructions for university level students

University students and students from universities of applied sciences sign up to each country's country coordinator either themselves or with their professor's help. The teacher/professor can direct their work and, for example, use it as a part of a course.

Do the following:

1. Gather a group of 1-5 students and sign up to the competition. The sign-up begins on the 5th of January, 2022. We wish that you sign up to your country

coordinator as soon as you have decided to participate. The posters do not need to be ready then.

2. Read through the competition rules and instructions.
3. Return your group's participating poster to the country coordinator as per their instructions by the 1st of February, 2023.

The national jury will go through all the returned posters and choose the winners to be sent to the final and to be evaluated by an international jury. An exposition will be assembled out of the best statistical posters and shown in the 64th ISI World Statistics Congress in Ottawa, Canada. The international winners will be released in July 2023 and the winning posters and their creators published online.
